

Graduation Message to All

June 03, 2017

Dear friends, relatives and Family Tree Private School,

I would like to thank you for all your support over the time I have been with this organization. I probably wouldn't have made it this far without your guidance since you all have provided shade from the harshness of the world and given me enough nutrients to provide my own fruit. Someday, I intend to help others with the education you have given me and the rest of my family.

Ever since I entered this "Tree" I've experienced nothing but joy with time spent with my family. For example, back when I was in public school it was difficult as I tired but could not even speak a word to them. But now I am able to actually greet them in the morning because of you. So once again, I say thank you for all your help. This chance has also provided me to study during my own time and be refreshed. This refreshment was only possible thanks to you and your company Family Tree. In fact, you can say that without you this message wouldn't have been written at all. This changed everything from my negative outlook of the world to my seriousness of studying which lacked during my public-school years. So, this change was for the better in my opinion and it gave me the opportunity to feel alive once again in life.

This also provided a test of character which I am still working on till this day. My soul is now even closer to the Lord than it ever was before. So, thank you for all the warmth and kindness you have provide me.

Sincerely,

Barak Alexander Martinez
